Improve the Safety, Speed and Efficiency Of Epidural And Spinal Anesthesia

Get rapid identification of spinal midline and epidural location with Accuro®.

Certainty Can Be Effortless.
Now epidural and spinal anesthesia can be administered faster and more precisely than ever before. The Accuro spinal navigation device automatically identifies spinal midline, trajectory, and depth during neuraxial anesthesia and is superior to ‘blind’ palpation irrespective of provider experience, as demonstrated in randomized controlled trials.

PROVEN CLINICAL BENEFITS*

- Reduction in needle redirects
- Reduction in needle insertion time
- Overall patient satisfaction
- Reduce risk of complications and placement failures
- Save time and money
- Improve patient satisfaction
The Latest Advancement In Spinal Guidance Technology Is Small—And Mighty.

Accuro’s patented image guidance visualizes bone landmarks and guides you with automatic epidural location and depth.

SEE more than 5X* enhancement of bone-to-tissue contrast with BoneEnhance® image reconstruction technology.

FIND the ideal insertion point with Midline (red dashed line) and Cross Hair indicators.

AUTOMATICALLY IDENTIFY epidural location with success rates exceeding 94%* using SpineNav3D™ technology.

MARK needle placement by gently pressing Accuro Locator® needle guide against the skin.

Real-world Accuro success stories:

“A morbidly obese patient had two difficult epidural placements by other anesthesia providers. Both epidurals failed after six hours... I utilized the Accuro device and placed a working CSE within five minutes... Both the surgeon and patient were pleased. It was a fabulous example of the need for the device.”

– Beth Ann Clayton, DNP, MS, CRNA
Assistant Professor of Clinical Nursing University of Cincinnati

“Accuro is a game changer... I use it now in all my procedures and to train our residents. Not only are we improving our first attempt success rates with Accuro, but we are also noticing a reduction in back pain and wet taps. By improving efficiency and reducing risk, we are greatly improving the standard of care we provide to our patients.”

– Antonio Gonzalez, MD
Assistant Professor of Anesthesiology Yale School of Medicine
