When dealing with challenging airways, Bougie Introducers can be invaluable. Sometimes, however, they might not be enough. In such cases, a Video Laryngoscope can be particularly helpful. The STIG (Steerable Tracheal Intubation Guide) can assist in navigating the airways. Simply hold the STIG between your thumb and forefinger, and use your thumb to move the integrated slider forward and backward to flex the tip anteriorly and posteriorly. This helps guide the device between the cords and into the larynx.

- **Flexible, steerable tip** makes it easier to navigate difficult airways.
- **Use in conjunction with Video Laryngoscope** for optimal results.
- **Innovative slider** is used between the thumb and forefinger to move the tip anteriorly and posteriorly.
- **Tabs on slider** are easy to grip and maneuver, especially when used with gloves.
- **Slider tabs** situated so they will not need to pass through vocal cords.
- **Blunt silicone tip** reduces the risk of tracheal trauma.
- **Bright phosphorous coating** on tip makes it highly visible, especially when used with Intubrite dual ultra-violet and LED lights.
- **Pre-curved** to provide anterior flexion, use the control mechanism to retro-flex and straighten to advance beyond the cords.
- **Graduation marks** from 10cm to 50cm (65cm overall length)
- **Use with ETT’s with 7mm inner diameter or larger**
- **Latex free**
- **Box of 10**
- **Sterile for single patient use**
- **Code CM001-EU**
- **Packaging dimensions:** 70cm x 12cms
